Education

Carleton University

Ottawa, ON

BCS in Computer Science AI/ML, Minor in Statistics — 3.97 GPA

Expected April 2027

- **Courses:** AI, ML, Data Structures and Algorithms, Database Management Systems, Operating Systems, Object Oriented Programming, HCI
- **Extracurricular:** Executive for Varsity Badminton and Badminton Club, Ultimate/Volleyball Intramural

Experience

Shopify

Toronto, ON

AI Product Data Science Intern

December 2025 - Current

- Created an internal AI usage leaderboard that transformed **millions** of raw data points into engaging insights, capturing company-wide and C-suite attention; the project increased AI tool adoption and literacy while improving visibility of misuse across the organization
- Increased employee data literacy and engagement by achieving a **90%** utilization rate across **10k+** staff members through the development of "Shopify Wrapped," a data visualization that integrated generative AI imagery and annual performance metrics into personalized insights

Shopify

Toronto, ON

Software Engineering Intern

May 2025 - December 2025

- Improved **p50 import times from 6s to 4s** on large-payload CSVs by migrating legacy product create/update services to product set service, handling **500M+ daily GraphQL mutations**, optimizing backend performance through flag rollouts, log monitoring, issue tracking, and bug fixes
- Reduced CSV product delete time by **92% (60s → 5s)** on products with large media files, improving merchant experience by optimizing **Ruby on Rails** backend pipelines through batch processing and elimination of N+1 query issues.
- Saved an estimated **1000+** engineering hours through the development of **automation** scripts in **Python** to streamline manual tophatting
- Conducted interviews with **10+** merchants, identifying **3** high-impact improvements to AI-driven personalization and reduce errors in CSVs.

CIBC

Toronto, ON

Project Management Intern

Sept 2024 - April 2025

- Reconciled over **\$1M** in project financials weekly, identifying discrepancies to ensure budget compliance and maintain reporting accuracy
- Utilized **JIRA** and **Confluence** to track tasks and document project-related artifacts improving collaboration and project transparency

Canadian Border Service Agency

Ottawa, ON

Data Analyst Intern

May 2024 - Aug 2024

- Processed **100M+ records daily** from enterprise data warehouses, enabling **real-time pipelines** and analytics dashboards for federal operations
- Implemented automated SQL workflows for real-time enterprise data access, improving reliability and decision-making support
- Transformed raw SQL data into interactive **Power BI** dashboards, enabling clearer client insights through charts and pivot tables

Carleton University

Ottawa, ON

Web Development Teaching Assistant

Sept 2023 - Dec 2023

- Conducted in-person tutorials and office hours for **300+** students, improving academic performance through personalized support
- Applied extensive knowledge of **Node.js**, **Express**, **WebSockets**, and **JavaScript** to offer guidance in approaching assignments effectively

Projects

Valorant Round Win Predictor Agent 🤖

Dec 2025

- Engineered a predictive classification model that forecasted Valorant round outcomes with **77%** accuracy by synthesizing game-state features
- Implemented a computer vision module using **OpenCV** to extract live game-state variables from match broadcasts, generating real-time win probabilities that outperformed industry-standard benchmarks such as **Amazon AWS Spike Defuse** by **10%** in predictive certainty
- Built an automated data pipeline to web-scrape match logs into a centralized repository, transforming raw data into training and test sets

Clean Vision - Computer Vision & Machine Learning to Sort Waste 🗑️

Mar 2023

- Winner among 100+ teams at Hack the Hill **Maker Con Challenge**, successfully developing an app that sorts through waste
- Built Clean Vision, an AI-powered waste classification app, by leveraging **real-time**, **event-driven pipelines** with **WebSockets** and computer vision models (**OpenCV** and **Tensorflow**) in **Python** to mirror large-scale observability systems

Community & Leadership

Carleton University Blueprint

Ottawa, ON

VP Projects

Sept 2024 - Current

- Led a 5-person team to build a hospital wait-time optimization tool (FLOW) for GTA hospitals using **Mapbox** and **custom APIs**
- Scoped and led development of a user-friendly membership and payment platform (JOCA) using **React**, **Supabase**, and **Stripe**
- Oversaw hiring and established engineering best practices across the organization, including **CI/CD pipelines**, **linting**, and tech stack

Skills

Programming

Python, Ruby, Java, C, C++, SQL, JavaScript, TypeScript, HTML/CSS, R

Frameworks & Libraries

Rails, React, Next.js, Express, Flask, FastAPI, Selenium, Node.js, Vite, Bootstrap, Spring

Tools & Platforms

GraphQL, REST, AWS, GCP, Azure, Docker, Kubernetes, MongoDB, PostgreSQL, MySQL, Buildkite, Observe, Git, Figma
